- Enter your license number (Trial doesn't require a license number)
- Select next or browse to specified folder
- Make up a password
- Select install
- Select yes to restart computer
- Select finish

From CD:

- Insert CD into drive
- Select open
- Select next
- Check to agree to terms
- Enter your license number
- Select next or browse to specified folder
- Make up a password
- Select install
- Select yes to restart computer
- Select finish

Using AppRunLock

To make any permanent changes use the administration access

Creating the white list:

- Click on the AppRunLock icon on the right side of the task tray.
- Select settings
- Enter Password
- Enter executable name of program you would like to run, or click browse and select program.
- Click add new
- You can remove listed items by selecting the item and clicking remove selected
- Select save
- When you have made all changes and are ready for the end user to access the computer click on the restart options and select user ReStart.

Note: All changes made here require a reboot
