

SurferQuest Installation Checklist

- Freshly install Windows XP or Windows Vista.
- Set PC login to automatic. (The PC must boot into the desktop without any human interaction)
- Make sure the date/time is correct.
- Set TCP/IP settings in Network Connections (make sure you have an internet connection).
- Install applications (Finish installs completely). (Please include Adobe: Flash & Shockwave Player! Install the latest Java update.)
- Put any shortcut icons on the desktop.
- Install peripheral devices such as printers.
- Install any drivers needed.
- Set screen resolution to 1024x768.
- Do not install any additional security or anti-virus software. If anti-virus or Ad-aware software is installed, please uninstall it.

Make absolutely sure that all Microsoft Windows updates are installed and then turn off Automatic Updates. Also disable Adobe Reader's Automatic Updater (if installed)

BIOS Setup

- Set: *A BIOS password*
- Set: After Power Failure to (*Power On*)
- Set: Boot Sequence to (*Hard Drive First*)

Setup SurferQuest

- Download SurferQuest from www.surferquest.com/downloads/setup_full.exe or install from disk.
- Enter your SurferQuest License when asked during setup.
- Finish the SurferQuest installation. When the PC is rebooted it will boot up in Kiosk Mode.
